

We're leaders in edger and gang replacement parts.

Promac designs and engineers custom-built saw guides. We work closely with our clients to develop approved drawings and samples that ensure the final product meets their exact specifications. Promac is one of the major manufacturers in North America making saw guides today.

PROMAC ALUMINUM SAW GUIDES

- Built with aerospace aluminum
- Completed with Type III Engineering Hard-coat Anodized Finish
- Light and easy to handle
- Known as the safe choice for saw guides

PROMAC HARDENED STEEL SAW GUIDES

- Ideal for thin or shifting guides
- Rugged and long-lasting
- Ground for flatness and accuracy

PROMAC BABBITT JIGS

Promac designs, builds and repairs Babbitt Jigs based on custom orders to fulfill our clients' requirements. Our Babbitt Jigs feature double-action air cylinders and spring-activated pusher pins that release the pads from the mold.

For when uptime counts.

Promac's reputation for quality, durability and top-of-the-line service is something you can count on every time. Each custom machined part is carefully designed and manufactured to the highest standard of precision by skilled trades people.
